#### **September 1 Crop Production Forecast**

The September 1, 2008, Mississippi Cotton yield per acre is forecast at 1,027 pounds, up 61 pounds from last year and 93 pounds above the August 1 forecast. If realized, this will be a record high. Production, at 770,000 bales, is down 42 percent from 2007, but 8 percent above the previous month. Soybean production is forecast at 82.8 million bushels, up 46 percent from last year. If realized,

this would be the third highest production on record. Yield per acre is forecast at 38 bushels, down 2 bushels from last year's record high, but 3 bushels above the previous month's forecast. Corn for grain production for 2008 is forecast at 106 million bushels, down 25 percent from last year's record high production. Yield per acre is forecast at 140 bushels, down 10 bushels from the previous year's record high. Production of Rice is forecast at 16.9 million hundredweight, up 20 percent from 2007. The yield per acre is forecast at 7,400 pounds, down 50 pounds from last year's record high. Peanut production is forecast at 69.3 million pounds, up 17 percent from last year.

<sup>&</sup>lt;sup>1</sup> 2003-2007 revised. Totals may not add due to rounding.

Greenhouse/Nursery, Other Seed and Other Field Crops. Forest Products on a long production cycle (10 years or more) are not included in this category. Products with short production cycles such as horticulture and Christmas trees are included in this category. Therefore, there is some overlap between Other Crops and Forest Products.

Source: Harvest of Forest Products Report, Mississippi Cooperative Extension Service, Forestry Department. This total includes the standing value of receipts for all Mississippi landowners, not just farmers.

Source: Economic Research Service.

Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

<sup>&</sup>lt;sup>1</sup> Marketing year average (MYA) prices are weighted average prices for the U.S. marketing year of August-July.

Second year.

Purchases from producers as reported by private firms and rice (rough equivalent) shipped from producers as reported by cooperative mills.

<sup>&</sup>lt;sup>3</sup> Prices and marketings include late reports and revised data for August 2007-July 2008. Final monthly prices and marketing and MYA prices will be published in the January 2009 "Agricultural Prices" report.
